DESIGN QUARRY

CONCRETE WORKS

...infinite possibilities!

We live in a time where the world is constantly evolving. In a rush to catch the 'Trend Train', so often, quality suffocates the most! Whoever propagated that trendy is being weighed down by old-school methods, and is in effect losing its moment of shine, has clearly not had a rendezvous with us!

DESIGN QUARRY, incepted to challenge this notion, is proud to be rooted with traditional crafts, materials, and ideas while bringing something bespoke to the table. Every single time! Just like a quarry presents a unique stone in every excavation.

Other than producing spectacular handcrafted inlays and creating limitless possibilities of marble tiles, Design Quarry introduces CONCRETE WORKS to you here.

At CONCRETE WORKS, we use decorative concrete that is, basically, a coating of concrete capable of adapting to any surface. It can be executed on floors, walls, ceilings, bathrooms, terraces, facades, furniture, etc.; your visualization is our inspiration. It lends character to modern and minimalist spaces, at the same time, brings discreet sophistication with classic, rustic or antique finishes to existing property.

With minimum thickness (1 to 2.5mm) and high adhesion, Concrete Works has the perfect decorative solution to avoid noisy works. We achieve continuous coatings with no joints and limitless extension. The product also ensures maximum functionality and aesthetic!

Owing to its character and technical advantages, it is a great alternative for renovations too.

We love to add new products and designs to our wide portfolio. Continuous research and development is the highlight at Concrete Works. Working with the best of architects and interior designers across the country allows us to expand our thinking and creativity; they pose questions and our Creative Lab answers them!

Concrete's new avatar is a product trending across the world right now; however, it comes with an assured longevity without a hidden asterisk! Let us together bring forth the magic of ingenuity!

VERSATILE SERIES 01

For any surface that needs to be covered, renovated or created from zero, Concrete Works' Versatile Series imparts an extremely sophisticated effect with great architectural value through cement based finishes. Our Versatile Series comprises of TURMALINA and KIT CONCRETE (Microtopping).

Though applied at reduced thicknesses of 2-2.5 mm, Turmalina and Kit Concrete adhere firmly to the underlying surface. Hence, they are perfect for private homes, businesses, showrooms or exterior areas, be it for poolside or restaurant, store or shopping centre. They are equally perfect for coating vertical surfaces, such as plasterboard walls or masonry on stairs, in bathrooms, showers, and many more.

The possibilities of our Versatile Series are infinite!

VERSATILE
SERIES

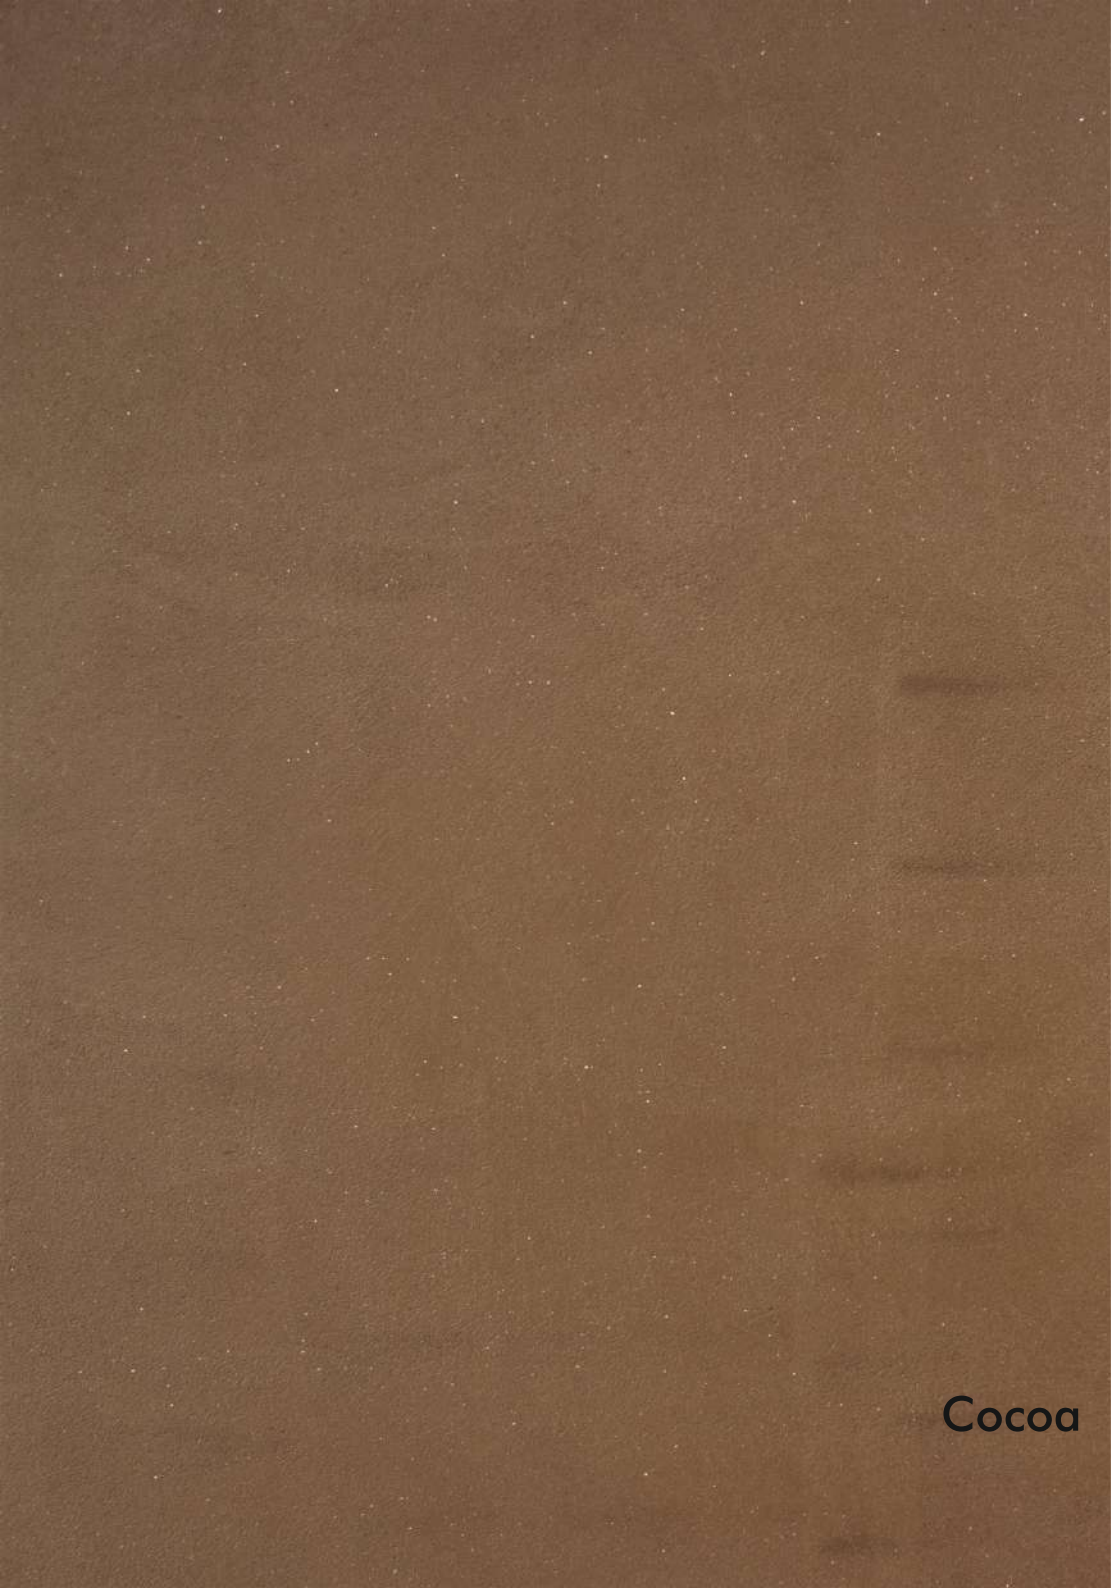
01

TURMALINA is a continuous coating that perfectly emulates the mineral, characterised by its chromatic versatility and energetic strength.

Minerals are one of the most fashionable elements in indoor decoration; Turmalina gifts this advantage!

Features:

- Seamless application
- Does not crack
- Adds only a 2-2.5mm layer over the existing surface
- Can be used for walls, floors, furniture, exteriors, and others
- No curing needed; ready to use in 8-10 days
- CE certified product



Cocoa

Galaxy Black

VERSATILE SERIES

01

KIT CONCRETE is a fine-grained continuous concrete coating that adapts beautifully to any environment bestowing an original and unrepeatable touch as it is laid by hand by expert craftsmen.

Quick to install, it imparts depth, light, and harmony to any space.

Features:

- Seamless application
- Does not crack
- Adds only a 2-2.5mm layer over the existing surface
- Can be used for walls, floors, furniture, exteriors, and others
- No curing needed; ready to use in 8-10 days
- CE certified product

WALL SERIES 02

For any surface that needs to be covered, renovated or created from zero, Concrete Works' Wall Series imparts an extremely sophisticated effect with great architectural value through cement based finishes. Our Wall Series comprises of CLASSIC WALL and ECOCEMENT.

Though applied at a negligible thickness of 1mm, Classic Wall and EcoCement adhere firmly to the underlying surface. As the name suggests, the Wall Series is recommended only for vertical surfaces. Hence, it can be used on wardrobe shutters, ceilings, walls, etc. in private homes, showrooms, restaurants, shopping centres, and others.

Concrete Works' Wall Series can be personalised to suit a style or a particular colour scheme in addition to its trademark cloudy or water-like effect.

The possibilities of our Wall Series are infinite!

WALL SERIES

02

ECOCEMENT is a decorative application of concrete that creates a beautiful continuous surface.

Though natural concrete, it is a thin layer that saves further increasing the thickness of walls. With its infinite colour possibilities, it can be personalised to your own style. EcoCement is a cost effective yet impactful solution!

Features:

- Seamless application
- Adds only a 1mm layer over the existing surface
- Great alternative for walls and exterior vertical surfaces
- Quick application; ready to use in 3-4 days
- No curing needed despite being concrete

Cobre Oxidised

DECOR
SERIES

03

RAPHIA exceptionally emulates the natural environment by including recycled particles like wood shavings. It is a medium-grained continuous coating.

Raphia is handcrafted, natural, and exotic!

Features:

- Seamless application
- Does not crack
- Adds only a 1-2mm layer over the existing surface
- Useful for any vertical applications
- No curing needed; ready to use in 3-4 days
- CE certified product

DECOR SERIES

03

MUKALI exceptionally emulates the natural environment by including recycled particles like wood shavings.

Medium-grained Mukali coating includes Mukali wood chips achieving a minimal thickness to provide a natural and flexible second skin to the surface.

Features:

- Seamless application
- Does not crack
- Adds only a 1-2mm layer over the existing surface
- Useful for any vertical applications
- No curing needed; ready to use in 3-4 days
- CE certified product

DECOR SERIES

03

DENIM, a cotton fabric used to make clothing for both working and fashion garments, is the base of this coating that evokes the contemporary urban world.

It contains coarse-grained natural fibres of original denim; thus, being one of the trendiest option in the Decor Series!

Features:

- Seamless application
- Does not crack
- Adds only a 1-2mm layer over the existing surface
- Useful for any vertical applications
- No curing needed; ready to use in 3-4 days
- CE certified product
